25 Routes
in
Thailand

W o r k a t i o n & S t a y c a t i o n n

As a result of the recent COVID-19 pandemic, the 'Work From Anywhere' concept has become a reality and workcations are becoming increasingly popular around the globe. Getting away and being free from your regular workspace is an option which is both conducive and relaxing to many. In the current climate, anywhere and everywhere can be your office and the worlds of work and travel have begun to increasingly overlap. Thailand is one of the most popular workation destinations for travelers and digital nomads who are looking to expand their horizons along with their networks.

Tourism Authority of Thailand (TAT) has compiled a list of a total of 170 products and tourism services for tourists interested in a workcation or staycation in Thailand, with marketing potential from across the country. These hotels and tourist attractions were divided into 25 routes that showed diversity and popular appeal and catered to the needs of a variety of lifestyles. More importantly, each and every entry in the list feature the four main concepts of workation - Healing, Fulfilling, Motivating, and Comforting. We are confident that potential workationers and staycationers will be impressed with the accommodation and attractions that we are striving to promote and that they will contribute to creating a whole new working world.

The Morgan Village

Phangnga

**A cool, authentic way of life at
The Morgan Village.**

This village is home to the Morgans, the sea villagers who have been living on the Surin Islands for over a hundred years. They mostly rely on nature for sustenance, fishing from the sea for a living. They are particularly expert in sailing, using the stars as their guide. Another uniqueness feature of The Morgans is their housing structure. Visitors here often exclaim that they feel like they have stepped into another world.

The main highlight here is the beachfront village where wooden houses with thatched-roofs sit neatly in line in what looks like a scene from a movie. The materials and craftsmanship put into building their houses are also extremely unique to the tribe. Due to the sea front location, strong winds and sea salt, their houses can be easily damaged so the villagers need to use authentic natural materials to create them. Moreover, they also craft souvenirs from natural materials for visitors to shop and take home as a keepsake of their visit.

Phangnga

Black sand beach. “The magic of Thai nature”

This unique black sand beach is located in Nang Thong public beach. The sand here contains traces of cassiterite, left over from when the area existed as a mining town. When the black stone was washed in by the tide, the villagers would filter it and sell it. Eventually, the mining industry here died out, but the cassiterite remained and the beach became a draw for tourists visiting Phang Nga.

The highlight of this spot is the distinctive black sand that reflects and sparkles like glitter in the sun's rays. When combined with the white sea foam that washes upon the shore, you would be forgiven for thinking that you are in a dramatic movie scene. Black Rock Viewpoint

Phuket

A vibrant sunset scene over a lush landscape. The sun is a bright, glowing orb in the center of the frame, partially obscured by a large, circular lens flare. The sky is a mix of soft pinks, oranges, and blues, with wispy clouds. Below the horizon, a dense line of green trees stretches across the middle ground. In the foreground, a field of tall, green grasses and clusters of small, light pink flowers dominates the view. The overall mood is peaceful and picturesque.

**This 360 degree panoramic
viewpoint, is Phuket's latest
must-visit landmark.**

The black rock is another good choice to check out because it's not very far from Karon viewpoint, and you can experience stunning 360 degrees views here.

The black rock viewpoint is not a commercialized check-in point for tourists at present. It is located in Soi Laem Mum Nok, Tambon Karon, Amphoe Mueng Phuket, Phuket province, not too far from Karon Viewpoint. Windmill Viewpoint

Phuket

Absorb the beauty of the emerald green ocean, surrounded by scenic twin capes of Krating and Promthep.

The Windmill viewpoint is located not far from Promthep cape but is such an impressive spot that it attracts just as many visitors as the cape itself nowadays. A former alternative energy station, the shimmering ocean and rolling hills in the background can easily have visitors believing they are no longer in Thailand.

From The Windmill viewpoint, you can look out over the Promthep cape and Yanui beach. It's a striking view and it would be rude not to take some snaps as memories of your visit. It's also in a convenient location for hopping around the other major tourist attractions in the vicinity.

Promthep cape

Phuket

**Melt away in the day's most romantic
hour and relive precious memories.**

This is the spot where Thailand standardizes its sunset time. There's a saying that if you have not visited Promthep cape, you have really arrived in Phuket. You can also walk down to enjoy the emerald green of the ocean, which contrasts with the colour of the rocks and listen to the hypnotic sounds of the waves crashing against the cape.

Around Promthep cape area lies a series of steps for you to sit down and enjoy watching the golden sunset. However, if you want to get that bit closer to nature, you can also make your way down the path to the end of the cape where you can see the emerald green ocean and the last embers of Thailand's latest sunset. When seen in contrast with the turquoise Andaman waters, the effect is simply breathtaking.

* The best time to arrive is just before sunset (16.00-17.00)

Rong Khun Temple

Chiang Rai

Sightseeing at Chiang Rai's most majestic place of worship

Wat Rong Khun is a famous temple designed by Chalermchai Kositpipat, a Thai national artist. Both the exterior and interior of the temple are pure white, which has led to foreigners naming it, unsurprisingly, as 'Thailand's White Temple'. The temple features decorated gable apexes and other meticulous details throughout and the Naga serpents are decorated with fragments of embedded mirrored glass, which glitter as they catch the sunlight. The creator intended the design to reflect the Buddhist virtues, the white color symbolizing the purity of the Lord Buddha and the shining mirrored glass symbolizing his enlightenment.

The ordination hall is set on a mound with a clean, clear lake a mirror image of the building. The long pathway leading to the ordination hall also symbolizes overcoming the cycle of birth and death and entering Nirvana. The ceiling of the building conceptualizes important Buddhist teachings -- concentration and discernment, through the actions of the animals and creatures situated at the apex.

Apart from the distinctive architectural design, Rong Khun Temple also possesses breathtaking murals within the ordination hall, which are the heart-crafted work of Kositpipat, the national fine art artist himself. Visitors should roam around both the exterior and interior of the temple to get a deeper appreciation of Buddhist art.

Rong Seur Ten Temple

Chiang Rai

Check-in at Chiang Rai's landmark, The Blue Temple of faith

Renowned as one of the top aesthetic temples in Chiang Rai, this temple laid abandoned 80-100 years ago. It has been told that back in the days when the area was still undeveloped, many wild animals, including tigers would roam around. Passersby would commonly see tigers jumping back and forth over the water channels, leading to the area being named 'Rong Seur Ten' (Dancing Tiger Channel).

This temple is visually distinctive with its cobalt blue and gold color scheme. The cobalt blue reflects the worldwide propagation of the Lord Buddha's doctrine which is as practical and as true as the color of the blue sky. The interior houses beautiful architectural Buddhist designs, a work of Puttaga Garbgeaw (Chalermchai Kositpipat's student). Inside the ordination hall stands the pearl-colored Buddha image and numerous murals depicting scenes from Lord Buddha's lives.

Lagoon

**A cave adventure which brings you
close to the enchanting beauty of nature.**

“Lagoon” is a word used to describe a salt water pool in a valley, and while the path to this particular lagoon may be strenuous and challenging, alternating between climbing, crawling through narrow spaces and rappelling into ravines, the stunning views once you are in are more than worth it.

The crater-like sea surrounded by an open-top cave is the highlight of this attraction and the vividly colored water of the lagoon is simply transfixing. One thing visitors can do is swim into the middle and yell out loud to hear the voice echo impressively through the valley.

Hin Chang Si viewing point is where visitors can survey the perfect scenery of the Ubolratana Dam below. The viewing point is located 60 kilometers from the city of Khon Kaen, within the Nam Pong National Park area, 25 kilometers from the park's main office. Recently, the park's landscape has been improved and developed to include several nature trails and viewing points, making it a must visit for the nature worshipping tourist.

Throughout the trail, visitors get to experience panoramic views of the dam and the evergreen forest alternating with the limestone rocks, another one of nature’s unique and captivating designs. Check out big cave rock, the nearby skull-shaped rock, and the highlight, Chang Si rock – a towering cliff that shows traces of mud and elephants fur caused by wild elephants rubbing themselves against it. The rock’s name, unsurprisingly, actually means ‘elephant rubbing rock’.

The breathtaking scene of the majestic white Buddha image with the Ubolratana dam and lake in the background is a wholly impressive sight. Before being rewarded with such a view though, visitors need to take 1,049 steps up to the temple. We can guarantee it's worth the sweat and toil though.

The 1,049 step staircase with intricate Naga serpent decoration leads up to the imposing, majestic white Buddha image. For those who are not able to manage the long stairs, driving is also permitted but the route to the top is quite steep and tricky to negotiate, so drivers should be cautious. Once you get up to the top, the 360-degree view is waiting for you to marvel at.

At first, the island was inhabited only by fisherman, but at some point, pigs were brought over from the mainland to be bred. The growing herd of pigs, together with beautiful scenery of the island, began to attract a lot of tourists and the island became increasingly famous.

One of the temples always included in 'One day, 9 temples' day trips is Wat Arun Ratchawararam, or Wat Chaeng. This has a strong belief that making merit here will have a glorious effect on one's life. Moreover, Wat Arun is a prominent feature in most visitors' bucket List when they arrive in Bangkok.

Wat Arun is one of the most famous tourist attractions in Bangkok and the highlight of the temple is the grand Stupa with a Khmer architectural design. Standing tower - like beside the Chao Phraya River, this iconic temple is a draw for tourists, Thais and celebrities alike.

NaiUAN Yentafo Sao Chingcha

Taste some of the city's most flavorsome Yentafo noodles with great ingredients. Not to be missed for noodle lovers.

The legend began way back in 1970, according to Mr. Peat, the third generation owner. His grandfather had been a food taster since he lived in China, and when he arrived in Thailand, he maintained his love for great cuisine, making friends with fishmongers and people in the food industry. This passion and knowledge meant he had access to top quality ingredients, and he eventually decided to open a small restaurant in a shophouse near the Giant Swing.

Putting Ba-teng (Stir-fried pork in soy sauce) in Yentafo has become a great feature of the restaurant's recipe. The sweet and savory Ba-Teng combines with intense soup and soft, springy homemade noodles to make this a stand-out dish, a fact that is confirmed by its inclusion in the Michelin guide for two consecutive years.

Around mid-March, the wheat field is changes color to gold, making it a perfect spot for tourists to grab some great snaps. The fields look particularly impressive when a breeze sweeps through them and causes the rice to sway to and fro. Visitors who arrive at evening time will have the chance to take beautiful photos of the yellow sunlight hitting the golden field.
